NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)
Quarter IV 2021**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)****3.11 Business combinations and goodwill**

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Where equity instruments are issued by the acquirer as consideration, fair value of the consideration shall be measured at fair value of these instruments at the exchange date. In case the published price at the date of exchange is an unreliable indicator of fair value, the fair value of those instruments could, for example, be estimated by reference to their proportional interest in the fair value of the acquirer or by reference to the proportional interest in the fair value of the acquiree obtained, whichever is the more clearly evident.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost the business combination over the Company and its subsidiaries' interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortisation. Goodwill is amortised over 10-year period on a straight-line basis. The Company and its subsidiaries conduct the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

Business combinations involving entities or businesses under common control

Business combinations involving entities or businesses under common control are accounted for as follows:

- ▶ The assets and liabilities of the two combined entities are reflected at their carrying amounts on the date of business combination;
- ▶ No goodwill is recognised from the business combination;
- ▶ The consolidated income statement reflects the results of the combined entities from the date of the business combination; and
- ▶ Any difference between the consideration paid and the net assets of the acquiree is recorded in equity.

After the date of business combination, if the Company and its subsidiaries transfer and lose control of investment in these entities, the difference between the cost of a business combination and net assets, which was previously recognised in owners' equity, is recognised in the consolidated income statement.

3.12 Assets acquisitions and business combinations

The Company and its subsidiaries acquire subsidiaries that own assets and production activities. At the date of acquisition, the Company and its subsidiaries consider whether the acquisition represents the acquisition of a business. The Company and its subsidiaries accounts for an acquisition as a business combination where an integrated set of activities is acquired in addition to the assets.

When the acquisition of subsidiaries does not represent a business combination, it is accounted for as an acquisition of a group of assets and liabilities. The cost of the acquisition is allocated to the assets and liabilities acquired based upon their relative fair values, and no goodwill or deferred tax is recognised.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)
Quarter IV 2021**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)****3.12 Assets acquisitions and business combinations (continued)**

In case prior to the date that control is obtained, the investment is an investment in associate or a long-term investment and the acquisition of the subsidiary is not a business combination, when preparing the consolidated financial statements, the parent company shall not remeasure the previously held equity interests. Any impairment loss incurred is recognised as finance expense in the consolidated income statements and deducted against the value of such investments.

3.14 Payables and accruals

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Company and its subsidiaries. Payables to construction contractors are recognised for amounts certified by the construction work certificate signed with contractors, whether or not billed to the Company and its subsidiaries.

3.15 Provisions*General provision*

Provisions are recognised when the Company and its subsidiaries have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

When the Company and its subsidiaries expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated income statement net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance expense.

All foreign exchange differences incurred during the period and arisen from the translation of monetary accounts denominated in foreign currency at period-end are taken to the consolidated income statement.

- ▶ where the deferred tax asset in respect of deductible temporary difference which arises from the initial recognition of an asset or liability which at the time of the related transaction, affects neither the accounting profit nor taxable profit or loss;
- ▶ in respect of deductible temporarily differences associated with investments in subsidiaries, associates, and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at consolidated balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are re-assessed at consolidated balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Company and its subsidiaries to off-set current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on:

- ▶ either the same taxable entity; or
- ▶ when the Company and its subsidiaries intend either settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3.23 Earnings per share

Basic earnings per share amounts are calculated by dividing net profit/(loss) after tax for the period attributable to ordinary shareholders of the Company (after adjusting for the bonus and welfare fund) by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net profit after tax attributable to ordinary equity holders of the Company (after adjusting for interest on the convertible preference shares) by the weighted average number of ordinary shares outstanding during the period plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.
